LAVENDA OKEY ALELA

IT Support Specialist | User Support & Asset Management | Microsoft 365

00100 Nairobi, Kenya | +254 768 534 814 | lavenderalela20@gmail.com

PROFESSIONAL PROFILE

IT support specialist with 1+ year of hands-on experience supporting end users, workplace equipment and networks across 25 health facilities, with a documented 99% uptime record. Experienced in Tier 1–2 helpdesk support, user account and access management, IT asset records, incident logging and end-user training, using Windows, Ubuntu, Microsoft 365 and Google Workspace. Currently completing AWS re/Start training. Seeking an IT support role focused on service reliability, user adoption and secure technology use.

PROFESSIONAL EXPERIENCE

IT Specialist (IT Support / Technician) – HJFMRI (PEPFAR Program) | July 2025 – May 2026
Seme Sub-County, Kisumu, Kenya

- Delivered Tier 1–2 helpdesk support across 25 health facilities, sustaining 99% system uptime through proactive monitoring, preventive maintenance and rapid incident response.
- Managed user accounts, email and access, including setup, password resets and deactivation.
- Maintained IT asset records for devices and equipment to keep them accurate and audit-ready.
- Set up and supported printers, peripherals and AV/meeting equipment.
- Tracked IT suppliers and contracts.
- Trained healthcare workers and non-technical staff on EMR use, IT security best practices and standard operating procedures.
- Restored and maintained connectivity by configuring and troubleshooting facility networks, including IP addressing, firewall rules and inter-site links.
- Administered the TaifaCare EMR (OpenMRS-based) on Ubuntu servers and ran regular MySQL database audits to resolve data synchronization issues and protect data integrity.
- Led the migration of on-premises servers to cloud infrastructure, preserving data integrity and keeping service disruption to a minimum.

ICT Intern – Kenya Marine and Fisheries Research Institute (KMFRI) | May 2025 – June 2025
Kisumu, Kenya

- Resolved hardware and software issues for research staff by triaging and handling Tier-1 helpdesk requests.
- Improved issue visibility and response time by logging every technical incident in the IT tracking system.
- Configured user workstations and supported accurate, reliable research data entry.

EDUCATION

Bachelor of Business Information Technology (BBIT) | May 2026 – Present
KCA University, Nairobi, Kenya
